

Wyoming Voter Access Survey

Sources and expanded explanation for the public survey page

Purpose of this PDF

This PDF supports the Wyoming Voter Access Survey. The survey should stay short for social sharing and mobile use. This document gives voters background, identifies sources, and explains why each question appears in the survey.

Core principle: keep elections secure, verify eligibility, and make voting as easy as possible for every eligible Wyoming citizen.

Short survey wording

1. Should Wyoming create a statewide voting holiday for election days so eligible voters have time to vote?

Choices: Yes, for both Primary Election Day and General Election Day; Yes, for Primary Election Day only; Yes, for General Election Day only; Keep the current voting rules; Not sure.

2. Should eligible Wyoming residents be automatically registered to vote when getting or renewing a Wyoming driver's license or state ID?

Choices: Yes; No; Not sure.

3. Should Wyoming protect same-day voter registration, so eligible citizens can register and vote on Election Day?

Choices: Yes; No; Not sure.

4. What would make voting access work better in Wyoming while keeping elections secure?

Field type: Optional written response.

Safeguards this survey keeps in focus

- County clerk verification and local election administration remain central.
- Eligibility rules remain central: age, citizenship, residency, identification, and lawful registration.
- Accurate voter rolls, duplicate prevention, voter privacy, and correction procedures remain part of any policy design.
- Voter registration should stay free and available on Election Day for eligible citizens, paired with verification.
- This voluntary survey measures participant input and should be treated as a public signal for discussion.

Background facts used in the survey

[1] Primary Election: August 18, 2026; General Election: November 3, 2026.

[1] The 2026 Wyoming calendar says voters may register and vote at polling places on Election Day.

[2] W.S. 22-2-111 provides one hour away from work to vote in specified circumstances.

[3] Wyoming registration qualifications include age, U.S. citizenship, residency, and ID requirements.

[4] NCSL describes automatic voter registration through agency interactions, often with opt-out methods.

Expanded public explanation

Voting access is about practical barriers: work schedules, travel distance, registration paperwork, identification requirements, and timing rules.

Election security is about verifying eligibility, maintaining accurate rolls, protecting ballots, and counting lawful votes.

A voter access policy can address both goals at the same time.

The voting holiday question measures whether voters want guaranteed time to cast a ballot. The automatic registration question measures whether voters want eligible residents connected to the rolls through driver's license or state ID transactions. The same-day registration question measures whether voters want Wyoming to keep the current ability to register and vote on Election Day.

Neutral reporting plan

- Publish exact question wording and all answer choices.
- Publish total responses and collection dates.
- Label verified Wyoming voter responses separately from unverified responses when verification is used.
- Publish a short limitations note about voluntary survey interpretation.
- Keep source references separate from survey questions.
